DON'T JUST MANAGE TIME. CONTROL IT!

1:00 - 1:45 PM

SPEAKER: PHAT NGUYEN

The topic focuses on how undergraduate members can manage their time better in healthy ways while staying actively involved on campus, getting good grades, and working. Active members may become less engaged every semester due to reckless regard for academic performance or personal finances, which could lead to depression or worse situations. This workshop is designed to help them understand how much time they have in their hand and how to control it by taking initiatives to plan ahead and updating their calendar on smart devices. By the end of the workshop, attendees will have understood how much time they have in their hands to accomplish any goal they set for themselves—whether it's during school year or summer—and start to manage their time better every day by simply following five healthy ways: plan, check, update, adjust, and follow the calendar.
